Examen scris la disciplina LIMBA ENGLEZĂ

1. Complete each sentence by circling the best choice of grammar available below:

- a) If it (wasn't / weren't / hadn't been / wouldn't have been) for her only son, she wouldn't have got herself in so much trouble.
- b) I will be able to pay my friends back if I (shall get / have got / will be able to get / get) some money from home.
- c) George is a very unreliable person. If I (was / were / am / should be) you, I wouldn't lend him any money.
- d) Oh, your hair looks so bad. I am sure that if you washed it, it (didn't look / shouldn't look / wouldn't look / wouldn't have looked) so awful.
- e) We might not have been to the restaurant if Tom (hadn't recommended / didn't recommended / shouldn't have recommended / hasn't recommended) it to us.
- f) If you (phoned / had phoned / would have phoned / didn't phone) me yesterday, I would have given you the news.
- g) Don't worry, you've just got a cold. If you take an aspirin, you (feel / should feel / would feel / will feel) better.
- h) If people in cities (would use / would have used / used / should use) bikes instead of cars, there wouldn't be so much pollution.
- i) Actually it's a very friendly dog. If you don't touch it, it (doesn't bite / won't bite / bites / would bite) you.
- j) If Mike (did / didn't do / hadn't done / had done) a shopping list, he wouldn't have forgotten to buy sugar.

2. Translate into Romanian the text below

Almost every day newspapers, radio or television supply information about space programmes carried out by different countries, but mainly by the U.S.A. Important research centres concentrate their activity on solving the problems connected with space travel, such as: better and faster spaceships, adaptation of man to long-distance space flight, a more powerful fuel. A new profession is born out of the progress achieved in space investigation: spaceman. People who decide to take up this profession must meet certain requirements of age, education, flight time. None of the great strains which a spaceman has to face must be overlooked: weightlessness, air-pressure, solitude, etc.
